Hitachi Content Platform Anywhere Implementation Service

Improve Efficiency in Managing Content

Your company's employees want seamless file sharing and synchronization for work-related content. They feel that they have this for their personal content from the many free or low-cost cloud options available on the market. In fact, you need something similar to those solutions if you are going to solve such problems as:

- How to provision data to smartphones, laptops, tablets and desktops while keeping control and governance of data inside corporate IT.
- Inefficient storage and network utilization owing to massive content duplication.
- Reduced employee productivity resulting from inefficiencies.
- High cost for storage, backup and data management.

Hitachi Content Platform (HCP) Anywhere is the market's 1st end-to-end, integrated, on-premises solution to offer safe, secure file sharing and synchronization for enterprise IT. Leveraging the HCP object store, HCP Anywhere software brings the "killer app" of sync and share into the enterprise, using object storage and private clouds.

Your employees can access data and collaborate on any device, including laptops, tablets, smartphones and other noncorporate devices, from any location. You can rest easy knowing that they're doing it safely, securely, and with corporate oversight from your private cloud.

- **It's secure:** on-premises, encryption, access control, IT-managed, remote wipe, and more.
- **It's easy to use:** Microsoft® Active Directory® (AD) integration, client apps, self-registration, and more.
- **It's efficient:** backup-free, compression, single instancing, spin-down, multiple media types, metadata only, and more.

Solution

You can leverage the Hitachi Content Platform Anywhere Implementation Service to implement Hitachi Content Platform Anywhere. The service accelerates the time to deploy HCP Anywhere according to best practices and to integrate this solution into your environment. With the help of HDS consultants, HCP Anywhere can be used as an archive to address growing needs around data analytics, compliance, e-discovery, data protection and business continuance.

Figure 1. Hitachi Data Systems Service Portfolio for the Content Cloud

The service includes the following activities for Hitachi Content Platform Anywhere:

- Pre-engagement planning assessment for Internet connectivity (identify ports that are open, IP addresses, host names, DMZ, certificates on AD server, and so forth).
- Configuration and integration of HCP Anywhere into your IP network, including connection to core HCP.
- Knowledge transfer to help administrators effectively manage the solution after completion of the service.

Benefits

The Hitachi Content Platform Anywhere Implementation Service offers the following benefits:

- Quick deployment and easy transition to HCP Anywhere, which allow you to use the solution immediately to realize a rapid return on investment.
- Optimized and accelerated file and content environment built with the industry and business expertise of Hitachi Data Systems.
- Ability to make effective use of the solution at the completion of the service, thanks to a high-level overview of HCP Anywhere delivered in-house or online.
- Well-defined scope and deliverables so that you know what to expect.

HCP Anywhere provides:

- File sync and share capabilities from within IT, avoiding the risk of consumer clouds and of turning over control, security and protection to others.
- Improved productivity to meet demands, because HCP Anywhere enables users to sync their content across a variety of devices and share content with those both inside and outside the organization.
- Proper stewardship and governance of data.
- Elimination of unnecessary data copying for more efficient storage and network use.
- Reduced risk of noncompliance or of compromising intellectual property.

Why Hitachi Data Systems?

- Hitachi Data Systems consultants have many years of experience implementing Hitachi Content Platform for organizations of all sizes around the world and in all vertical industries.
- We offer a proven methodology for implementing HCP that addresses technology, process and people considerations.
- Our consultants properly integrate and test the integration of the HCP into your environment.

Offerings to Accelerate Your Success

Hitachi Data Systems Global Services offers market-leading storage consultants, proven methodologies and a comprehensive portfolio of services to help you manage your storage infrastructure (see Figure 1). Our broad spectrum of offerings includes assessment and consulting, planning and design, implementation, health checks, ongoing management and operations, and education and support services to help you meet your defined goals.

Your Success Is Our Top Priority

Rethink your content management strategy with Hitachi Data Systems, and convert your data into valuable business information. We can help assess and design a content solution blueprint, provide business justification (return on investment and total cost of ownership), implement technologies, and manage infrastructure. We also apply a Hitachi Content Platform reference architecture with best practices, enterprise content management transformation, and content migration. Let Hitachi Data Systems help you manage the day-to-day activities in your environment and reduce costs with our remote and on-site consultancy services.

Take the next step and contact Hitachi Data Systems to see how we can accelerate your time to success and transform your environment. Visit us at www.HDS.com/services.
